

# ARNOLD SZÉP

---

I design and build websites and everything in between.

(BUT MOSTLY THOSE TWO)

## STUFF I USE IN SOMEWAYS

---

HTML5, CSS, SASS, BEM, GRUNT, SVG, jQuery, JavaScript, ES6, Fetch, Ajax, RESTful API, HTML Drag and Drop API, PHP, SQL, RWD, CSS Animations, SVN, GIT, Parallax, Photoshop, WordPress

## INTRODUCTION

---

In the last 6 years I've built and designed more than 200 websites and webshops in parts or completely from scratch.

I proud my self of being able to build complex, responsive layouts, and to make sense of the messiest **CSS** and **HTML**. I write the CSS with a methodology that mostly resembles **BEM** and build the websites with my own custom grid.

I mostly use **JAVASCRIPT** without frameworks or libraries to build responsive sliders, galleries, scroll position dependent animations, interactive timelines and more, but I'm not against learning the newhotframework.js

My javascript task runner of choice is **GRUNT**.

I try to keep on top of the industry by reading blog posts, watching youtube and listening to podcasts.

## EXPERIENCE

---

2013 -

**Web developer / designer @ LIW Intermedia**  
Székesfehérvár - Hungary

Tasks: Webdesign; Front-end development;

2011 - 2012

**Web developer @ Orvoshop.hu**  
Székesfehérvár - Hungary

Tasks: Webdesign; Front-end development;  
Making of 3d animations & images

## EDUCATION

---

2009 - 2011

**Higher NTR Web-programmer @ Kodolányi János High School**

Main subjects: Server side programming;  
Webdesign; Client side programming  
1 month Internship at Absurd Advertising Agency

2009

**High School Graduation**
